

Waste Management and Cleaning Activity:

Introduction

At Samarth College of Engineering and Management Department of DS, we believe that effective waste management and community cleaning are vital for maintaining a healthy and sustainable environment. Our recent initiative, launched on Friday, aimed to tackle waste issues in our community while promoting cleanliness and environmental responsibility among residents.

Achievements:

Our initiative has made significant strides towards a cleaner and more sustainable community:

- **Waste Reduction:** We successfully reduced the amount of litter in our area demonstrating the impact of community engagement.
- **Increased Recycling:** Following our workshops, we saw an increase in recycling participation, with community members committing to better waste segregation practices.
- **Community Engagement:** Over 31 students participated in the cleanup event, showing a strong commitment to improving our environment.

Get Involved:

- **Volunteer:** Participate in upcoming cleanup events and workshops. Every pair of hands makes a difference!
- **Spread the Word:** Share information about waste management practices with friends and family to encourage more people to take action.
- **Commit to Change:** Make a personal pledge to reduce waste, recycle, and participate in community efforts.

Together, we can create a cleaner, healthier environment for everyone. Thank you to all who participated in our initiative and contributed to its success. Stay tuned for more updates and opportunities to get involved in making our Samarth College of engineering and management at better place!
